# MSIS-Bridge Buddy Program

# What is the MSIS-Bridge Buddy Program?

The MSIS-Bridge Buddy Program aims to pair an MSIS-Bridge student with a senior MSIS student mentor who can provide academic tips, share job search and co-op experiences, and provide advice to help you overcome challenges during your technical journey. The MSIS-Bridge Buddy Program is about friendship and support. You will be paired based on similar areas of interest, such as programs of study and hobbies. Throughout the semester we will be hosting several events, which will be interactive and give you an opportunity to meet friends across the MSIS programs!

## For MSIS-Bridge students

### You will...

Gain insights into degree requirements, get study tips, and advice on course selection

Learn more about the field of software engineering from your buddy's co-op or professional experiences

Have support throughout your academic journey as you learn new skills and take on new challenges

## And most importantly

### You all will...

*Make good friends and increase your professional network!*

## For MSIS students

### You will...

Gain mentoring and teaching experience, and sharpen your communication skills

Have the opportunity to give back to your community and have a positive impact on other students' lives
