

# ENCP 6100 Introduction to Co-op Registration Guidance

## Fall 2024

ENCP 6100: Introduction to Co-op is a pre-requisite to participate in the COE Departmental Co-op Program. Please visit the [COE Graduate Co-op website](#) for full eligibility requirements, co-op planning timeline, and more. Please note: Students do not need to take this course in their first semester.

ENCP 6100 is offered by department or program. Please use the chart below to find your relevant department and choose a section that fits your schedule. All sections are open to MS students, and the sections that are open to PhD students are indicated below. It is recommended you register as soon as possible to ensure you secure your seat in the class. Seats are on a first-come, first-serve basis up to enrollment caps. Late enrollments will not be accommodated. **You will not be permitted to enroll in a section outside of your department or program.**

### Special considerations:

- Robotics students in the Computer Science concentration should contact the Khoury College of Computer Sciences for further instruction. Please do not enroll in ENCP 6100.
- PhD students should register for their designated section of ENCP 6100 by department as indicated below. ENCP 7100, Career Management for PhD Engineers, will not be offered in Fall 2024.
- PlusOne students and Double Huskies do not need to take Introduction to Co-op if they participated in the co-op program in their undergraduate years at Northeastern University.
- If you are a student in one of the following programs, register for a section of Introduction to Co-op in the indicated departments:
  1. Internet of Things, Wireless & Networking Engineering – ECE
  2. Product Development – MIE
  3. Pharmaceutical Engineering – BIOE
- Data Analytics Engineering students in Seattle and Vancouver should register for their specific sections as indicated below. Students at these campuses should plan to take the course in their second semester unless otherwise communicated with by their academic advisor.
- ECE students in Seattle should register for their specific sections as indicated below.
- ENCP 6000 is for students in the MGEN program. It is not available as an alternative to ENCP 6100.
- There are three circumstances in which a student may request a waiver from ENCP 6100. If you feel you meet one of these criteria you may submit an [ENCP 6100 Waiver Request](#). It is highly recommended that you register for a class section until you receive a response to your waiver request. Waiver requests are evaluated just prior to the start of the semester, so please be patient.
  1. A student completed two years of consecutive full-time work experience **physically located in the United States** (may not include internships or remote work); OR
  2. Completed an equivalent course at another US-based institution of higher learning and received a grade of C or higher; OR

3. Completed an equivalent course while in the process of completing a graduate program at Northeastern University, outside the College of Engineering, and received a grade of C or higher.
